WORLD WIDE METRIC ACHIEVES ISO 9001:2008 CERTIFICATION

Comprehensive system audits every aspect of company operations to ensure quality

BRANCHBURG, NJ, March 10, 2016 – World Wide Metric, an innovative global supplier serving the maritime, oil and gas, industrial flow control and fluid power markets, is pleased to announce today that it has earned ISO 9001:2008 certification. The comprehensive system audits covered every aspect of operations.

"Any company that has been through the certification process knows that achieving ISO 9001 certification is demanding," said President Theo Contos. "Each individual in our operations must be wholly dedicated to the pursuit of quality. By scrutinizing our enterprise at every level, we assure that our customers are receiving superior customer service and the highest quality products."

ISO 9001:2008 is a quality management system standard that was developed by the International Organization for Standardization, which is an association of governmental and nongovernmental organizations from many countries. The ISO 9001:2008 standard is utilized to certify quality management systems that focus on continuous improvement, customer satisfaction and the active involvement of both management and employees in a process based approach.

"Fulfilling the strict requirements of the ISO 9001:2008 standard highlights our focus and commitment to deliver total customer satisfaction," Contos said. "We continually look for ways to better serve our customers while delivering the highest quality products, and the ISO 9001:2008 certification is a testament to that commitment."

About World Wide Metric
